## SEMINARI RICERCA E FORMAZIONE

Martedì 24 Giugno 2025

ore 15:00-17:00

AULA 205

# Bio-transformation of plastics into useful products for environmental remediation

[Prof. Juan Carlos Sanchez Hernandez](#)

Universidad de Castilla la Mancha

Bio-transformation of plastics is a process where microorganisms break down plastic waste into smaller, less harmful substances, or even useful products. This approach is part of a broader strategy to manage plastic pollution and create a more circular economy, where resources are reused and recycled.

SEMINARIO/CORSO APERTO A: Docenti | Teachers, Borsisti | Research Fellows, Assegnisti | Postdoctoral researchers, Dottorandi | PhD students, Studenti | Students  
SEMINARIO/CORSO IN LINGUA: italiana
